

REVIEW

Expert reviews are conducted by:

1. Scientific and clinical experts in diabetes, who review applications based on study rationale, team and environment, methods, and impact.
2. People affected by diabetes (PADs), who review applications from the unique lens of lived experience and evaluate the patient engagement and knowledge mobilization plan and research impact for people affected by diabetes.

APPLY

Diabetes researchers across Canada **submit applications** for funding projects that enhance our understanding of diabetes and its prevention, treatment, management, and cure.

RECOMMEND

Funding decisions are made based on the results of the rigorous review process and the expert recommendations of Diabetes Canada's National Research Council.

DEVELOP

Develop research funding opportunities and competition objectives based on recommendations from stakeholders (PADs, researchers, DC National Research Council).

INVEST / IMPACT

Diabetes Canada begins **investing funds** in selected research projects, and regularly communicates with researchers to **monitor research impact** and results and shares this impact with donors.
